The Astra Bollard Range

→ Amsterdam & Berlin Bollards

Berlin Bollards combine galvanised steel with inset slats to create a distinctive design. They can include a hole for a barrier cable or chain and provide a Class 3-compliant bicycle locking point. Amsterdam Aluminium Bollards feature a clean, contemporary profile with a durable aluminium construction, finished in a Monument powder coat.

[See Pages 217-219](#)

→ Stainless Steel Bollards

Astra's stainless steel bollards are constructed from robust heavy-wall 316 marine-grade stainless steel, our bollards promise enduring protection and resilience. Each bollard boasts a polished, sleek finish, enhancing the aesthetic of its surroundings with a touch of elegance. Opt for our stainless steel bollards for a perfect blend of longevity, functionality, and design flair, making them an ideal choice for any landscape.

[See Pages 220-221](#)

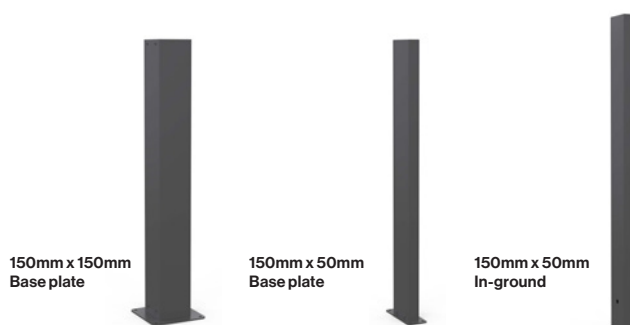

→ Concrete Bollards

Our Concrete Bollards are a creative street furniture item used to demarcate between areas. Concrete bollards also offer a great opportunity to add an artistic quality to a space while ensuring clear sight lines and acting as barriers to protect pedestrians and/or buildings. Concrete bollards can be used to protect pathways, play areas, and bicycle tracks. They can serve as removable bollards when detached or anchored to be used as fixed bollards.
